

The idea of letting everyone use cell phones while in flight is a very, very dangerous idea!! From a safety point of view it would be a disaster, I am a flight attendant and if there were an emergency nobody would be listening to our commands because they would be talking on their phones! We would also have air rage with people yelling at each other because some want to sleep and others would be talking (usually loudly) on their phones! Please don't do this!!!!!!!!!!!!!! This is truly a safety issue!!!!!!!!!!
